

09-1978 [C-8351] Applied Concepts/Chafitz - Boris (as a kit)

In november 2007 verscheen er weer eens een echte rariteit. Bijna 30 jaar lang bleef Boris als zelfbouwpakket bij experts en verzamelaars onopgemerkt. In zo'n geval moet dit model wel uiterst zeldzaam zijn!

The seller wrote...

You are bidding on vintage Boris electronic chess. This item made in USA. This item is hard to find. There have Boris electronic chess computer assembly manual and operation manual. In the Boris electronic chess computer operation manual to write as following: "Chess is the classic game of maneuver and control, It is played on an 8 x 8 board between two players, each with initial armies of 16 pieces set up as shown (Figure1). The players take turns, starting with White, each moving one piece per turn with the goal of capturing the enemy king. Only one piece can occupy a square at a time, and an enemy piece may be captured by captured its square and removing it from the game. The eight columns or files of the board are lettered. A-H and eight rows or ranks are numbered 1-8 as shown. Each square is identified by its file and rank; thus the black King is initially on square E8. and so on"

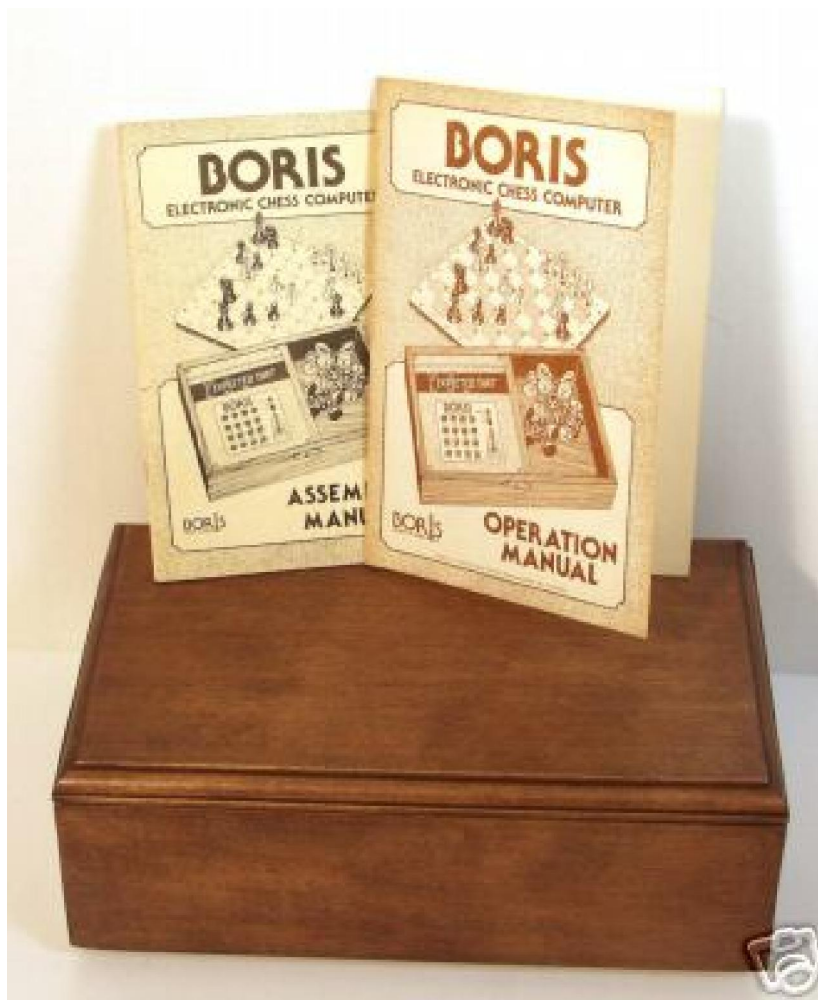

**In Boris electronic chess computer assembly manual
I just write CONTENTS as following:**

Get Ready to Assemble	page 1
Assembly Procedure	page 4
7805 Regulator Sub-Assembly	
7812 Regulator Sub-Assembly	
Slide Swirch Sub-Assembly	page 5
Display P.C.B Sub-Assembly	page 5
Main P.C. Assembly	page 7
Chassis Sub-Assembly	page 15
Front Panel Assembly	page 17
Final Box Assembly	page 18
Check-out Procedure	page 20
Parts List	page 21
Box Bluepringt	page 24
Warranty	page 25
Schematic	Centerfold

This item is old item , works well and keeps very good condition for that ages. This item is in the original wooden box. The item is good for collection, play, decorate and buy as gift to your friends. Please see the pictures. If you have any questions about this item, please let me know. Thanks for your view.

The buyer wrote...

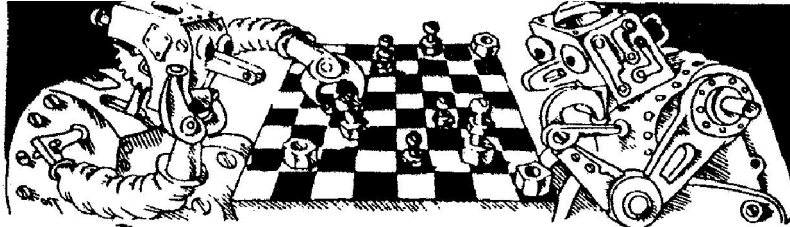

... I picked up an interesting Boris on eBay recently. It seems that this Boris was originally sold as a kit. It has a 26 page assembly manual in addition to the operations manual. Is anyone else aware that the Boris was sold as a kit? If so, do have any idea how many were produced as kits? ...

BORIS FROM SCRATCH!*

SAVE \$125.00

***Now Available In Kit Form.**

Here's your chance to build BORIS, widely regarded as the world's most advanced personal Chess Computer. We have received so many requests from Hobbyists and Kit Builders, that we're offering Him now, for the first time, in Kit form.

**YOU DON'T HAVE TO BE AN ELECTRONIC EXPERT
TO ASSEMBLE THIS ELECTRONIC MASTERPIECE!**

BORIS comes ready to assemble, with easy, step by step instructions, making this kit assembly a cinch for even the novice builder. Only the highest quality components are used in this advanced microprocessor based computer, and each part has been tested to meet our rigid quality control standards.

BORIS is the perfect teacher and opponent. As a teacher, he'll suggest moves for you if you're uncertain of what to do next, or use his exclusive position programmer to set up practice games or remove pieces for handicapping.

NO OTHER PORTABLE CHESS COMPUTER PLAYS A STRONGER GAME!

BORIS will keep you on your toes and make each game much more exciting by talking to you with messages flashed from his seemingly-human brain. BORIS will play at a level to teach a child, or let him loose, and he'll keep the attention of a Master.

We're only making a limited quantity available, so act now!

You'll never find an easier kit to assemble or a more challenging finished product!

Complete Kit—\$175.00. Thousands sold the world over for \$300.00.

All computer parts included for you to enjoy this world famous Chess Computer. Also includes blueprints so you may build your own enclosure!
