The handsome trophy and title of World Microcomputer Chess Champion went to Chess Challenger.

There were three prizes for the best performances by non-commercial entries. The prizes (£500, £250 and £100) were awarded to:

1-2 (shared): Mike 3.0 and Rook 4.0; 3: Vega 1.7 (winner of the non-commercial prize in last year's PCW micro chess tournament).

The best games played in the tournament and in the little challenge match that followed were all those between Challenger and Boris Experimental. Very interesting positions arose in Challenger's games against Sargon 2.0 and Viktor, the new champion being rather lucky to win them both.

SOME INFORMATION ABOUT THE COMPETITORS

- 1 CHESS CHALLENGER (USA) programmers not named but apparently including Dan and Kathe Spracklen. It ran on a 6502 processor in a Sensory Voice Challenger housing. The program used 20K of memory.
- 2 BORIS EXPERIMENTAL (USA) programmers not named but based upon the 2.5 program of Dan and Kathe Spracklen. It ran on a 6502 processor in a Modular Game System unit. 8K of memory.
- 3 MIKE 3.0 (England) programmed by Mike Johnson (his program Mike 1.0 won the first PCW micro tournament in 1978 and last year Mike 2.0 was 5th in the PCW tournament) and Dave Wilson. It was running on a 6502 processor with additional special chess hardware. 48K ROM and 24K RAM.
- 4 ROOK 4.0 (Sweden) programmed by Lars Karlsson. It ran on a DataBoard 4680 (Zilog Z8000 processor). 16K memory.
- 5 SARGON 2.0 (USA) programmed by Dan and Kathe Spracklen. It ran on a Challenger 4P with 1 disk.
- 6 GAMBIET (Netherlands) programmed by Wim Rens. It ran on a TRS-80 with 1 disk. 10K memory (approx).
- 7 MODULAR GAME SYSTEM 2.5 (USA) programmed by Dan and Kathe Spracklen (mainly). It ran in the usual Modular Game System housing, hotted up with a 6502A processor. 8K memory.
- 8 AUTO RESPONSE BOARD (USA) This unit, with the Sargon 3.0 program won last year's PCW tournament). This year it used the Boris/Sargon 2.5 program by Dan and Kathe Spracklen. Using a 6502 processor and 8K memory.
- 9 VEGA 1.7 (England) programmed by David Broughton (winner of 1979 non-commercial prize & 2nd place overall). It ran on a Horizon system with 2 disks.(Z80A processor). 12K memory.
- 10 VIKTOR (Switzerland) programmed by Herbert Bruderer. It ran on a P.F.I.A.T. (Privates Forschungs-Institut fur Androiden-Technik) unit (formerly Lexicon) using an 8085 processor. 8K memory, 4K operating system and 4K multilingual text.
- 11 ALBATROSS (England) programmed by Michael Parker. It ran on a Nascom I (Z80 processor) with cassette. 11K database and work space, 7K program.
- 12 FAFNER 2 (England) programmed by Guy Burkill and Alex Kidson. It ran on an Apple II (6502 processor) with 2 disks. 16K memory.
- 13 PRINCESS 1.0 (Sweden) programmed by Ulf Rathsmann. It ran on a PET (6502 processor). 12K memory (approx).
- 14 K.CHESS IV (England) programmed by Andrew Thomason. It ran (somewhat falteringly) on a Z80 home brew machine with single disk. 2.2K memory.

CHALLENGE MATCH - BORIS EXPERIMENTAL v. CHESS CHALLENGER

After the tournament was over, Terry Knight of Competence, the UK distributors of Applied Concepts units, challenged Fidelity Electronics and CHESS CHALLENGER to a match for the best of three games (to include the game that BORIS EXPERIMENTAL had already lost in the tournament) for a stake of £2,500. Here are the two games of that match.

So the game played in the tournament proved decisive, CHESS CHALLENGER winning the match by 2-1.

One advantage chess programs have over their human counterparts is that they can be in more than one place at a time. Both BORIS EXPERIMENTAL and CHESS CHALLENGER were competing in the first North American Microcomputer Chess Championship, which was played in San Jose, California concurrently with the World Championship here in London. CHESS CHALLENGER also won that tournament, with BORIS EXPERIMENTAL sharing second place.

The first World Microcomputer Chess Championship was organised by David Levy (International Chess Master and PCW's computer games expert) Kevin O'Connell (President of the Western European section of the World Chess Federation and PCW's micro chess expert) with considerable help from the staff of PCW and Michael Clarke - Tournament Arbiter Peter Morrish - Tournament Director
