**KASPAROV™**

## CHESS IS FUN!

Whether you are a Grand Master, club player or a beginner, the most important thing about chess is that it is fun! Millions the world over have discovered the thrills, challenge and joy of chess.

Playing against a computer adds to this fun. It's a tireless opponent that can give you a satisfying and exciting game, no matter how strong or weak you are. You can even take back or ask for help if you like!

Today's chess computers have become an accepted part of the chess world, serving not only to introduce new players to the world's finest game, but also encouraging them to take part in tournaments against human opponents. Chess computers can teach you all the basics of the game and keep up with you even if you go on to become a top club player.

Saitek has been at the forefront of this development, and has been responsible for many of the most interesting innovations. I have been personally associated with the company since 1983 and can therefore speak about its products from experience. It is the only chess computer company under Swiss management, so you know you are assured of quality and precision backed by a world wide guarantee and most importantly - hours of fun!

Garry Kasparov  
Chess champion of the world

## PORTABLE CHESS

### **E**LECTRONIC CHESSMAN

Your personal, portable chess tutor
